Hi Jennifer,

I plotted the MAO row counts by Date of Service (DOS YYYYMM) and normalized them using the approximate membership size for each payer. Please compare the distribution pattern for Humana against the other payers.

MAO004 Row Count From Pivot				
Row Labels	Aetna	BCBSOK	Humana	UHC
202501	7,187,426	81,928	472,486	4,599,406
202502	6,287,471	73,199	413,869	4,270,826
202503	6,719,831	75,182	445,694	4,851,702
202504	5,887,284	63,806	463,983	4,986,774
202505	4,965,924	60,794	432,587	4,603,302
202506	4,592,454	50,546	406,076	4,062,766
202507	3,896,400	50,976	435,630	3,505,377
202508	3,296,742	43,064	422,607	2,920,481

Upon further analysis , I noticed that the Aetna monthly MAO files appear to be cumulative, meaning each monthly file includes records from prior periods. As a result, older DOS months are being counted repeatedly when all files are aggregated together.

SRC_FILE_NM	DOS_THRU_YYYY	Year	RECORD_CNT	SUBMSN_RECORD_CNT	RE

MHS_MA_MAO4_202604_20260502.txt	202502	2025	544450	17070421	
MHS_MA_MAO4_202605_20260602.txt	202502	2025	547059	17369246	

To validate this, in the 3rd screenshot I filtered the Aetna data to a single file, **MHS_MA_MAO4_202601_20260204.txt** (i.e., the latest available file at that point). Even after selecting only that file, I was still able to retrieve January 2025 DOS records, which confirms that historical DOS records are being carried forward in subsequent submissions. And member diagnosis count trend made more sense this time except that it has shown claim lag for recent period.

Aetna-Corrected			
Row Labels	MAO Row Count	Approx. Membership Size	Row Per Member
202501	605,356	53,737	11.27
202502	547,059	53,737	10.18
202503	636,891	53,737	11.85
202504	582,444	53,737	10.84
202505	513,518	53,737	9.56
202506	533,085	53,737	9.92
202507	514,413	53,737	9.57
202508	488,777	53,737	9.10
202509	507,992	53,737	9.45
202510	501,051	53,737	9.32
202511	439,655	53,737	8.18
202512	466,927	53,737	8.69
202601	329,528	57,741	5.71
202602	317,855	57,741	5.50
202603	288,358	57,741	4.99
202604	41,592	57,741	0.72

This explains why the original Aetna row-per-member analysis overstated older DOS months if counts are summed across multiple files.

Understanding how each health plan structures and submits its MAO data is critical to interpreting completeness and identifying potential data gaps.

For Aetna, the monthly MAO files appear to carry forward historical DOS records in subsequent submissions. As a result, later files contain both current and prior-period data. This means that if one or two monthly Aetna files are missing, much of the historical DOS'S tracking inventory may still be recoverable from subsequent files.

However, we cannot assume the same behavior for Humana. If Humana files are submitted as monthly deltas or contain less historical carry-forward, then missing files could result in loss of tracking of DOS records for the affected periods. Therefore, understanding each payer's file accumulation and resubmission methodology is essential before assessing completeness, trending diagnosis volume, or evaluating the impact of missing submissions.

Thoughts?

Subject: Counts requested of MAO-004

Samir,

Your request today is attached, please note the Grain doesn't include NPI because NPI is not found in the MAO-004 files.

Grain: Distinct Count (MBR_ID, DX)

Group by SRC_FILE_NM, DOS_THRU_YYYYMM (instead of DOS_THRU_DT because there were over 10,000 records with the Day parameter)

Thanks,

Jennifer Oldfather
